SUMMARY

Electrical Engineering undergraduate with hands-on experience building full-stack web applications (React, TypeScript, Node.js) and AI-integrated products, complemented by a strong analytical foundation in Python-based data analysis. Adept at translating complex problems into efficient, scalable solutions, with a track record of shipping and deploying real-world projects end-to-end. Seeking to bring strong CS fundamentals, coding proficiency, and a builder's mindset to a product-based engineering role.

SKILLS

Programming & Analytics: Python, Pandas, NumPy, SQL, HTML, CSS, TypeScript, Django

Data Analytics Tools: Data Visualization, Dashboards & Reporting, Machine Learning (Basics), Google Cloud, Excel

Technical Knowledge: Automation Systems, Cloud Computing, Electrical Engineering

Professional Skills: Team Collaboration, Cross-Functional Communication, Analytical Thinking, Problem Solving

Other Tools: WordPress, SEO Optimization, Project Coordination

PROJECTS

Smart Hire Assistant – AI-Powered Applicant Tracking System

Tools: React, TypeScript, TanStack Router, Vite, Tailwind CSS, Supabase

- Built an AI-powered applicant tracking system supporting recruiter and candidate roles, resume upload, AI-driven resume analysis, and skill extraction.
- Implemented candidate ranking, job postings, and an analytics dashboard, using Supabase for authentication and backend data management.

RevCode – AI Code Review Platform

Tools: React, TypeScript, Tailwind CSS, Google Gemini API, Vite, Git, Vercel

- Developed an AI-powered code review platform that leverages the Google Gemini API to analyze source code, detect issues, and provide intelligent suggestions for improving code quality.
- Built a responsive and user-friendly interface, integrated real-time AI feedback, and deployed the application on Vercel using Git and GitHub for version control.

Netflix Data Analysis Project

Tools: Python, Pandas, Matplotlib, Seaborn

- Analyzed Netflix viewership datasets to uncover genre trends and engagement metrics.
- Built data visualizations and dashboards to communicate insights clearly.

Automated Plant Watering System

Tools: Arduino, Sensors, C Programming

- Developed an automated irrigation system using soil-moisture sensors to trigger pumps automatically.
- Improved water efficiency and reduced manual intervention through sensor-based control logic.

EXPERIENCE

Personal Assistant to the CEO — InterviewGod.ai

Jul 2024 – Present

Bengaluru, India (On-site) — AI-powered recruitment platform

- Supported daily operations, scheduling, and interdepartmental coordination for the CEO.
- Collaborated with HR and technical teams on AI- and analytics-driven recruitment initiatives, gaining exposure to how data informs hiring decisions.

Trainee — West Bengal State Electricity Distribution Company Limited (WBSEDCL) May 2026 – Jun 2026

Salt Lake City Metropolitan Area · On-site · Full-time

- Completed Vocational Training at WBSEDCL, Bidhannagar-I Division, gaining practical exposure to power distribution systems and substation operations.

- Trained in electrical safety practices as part of a structured, institute-affiliated program with B.P. Poddar Institute of Management & Technology.

Data Analyst Intern — Labmentix Private Limited

Sep 2025 – Oct 2025

Remote

- Conducted exploratory data analysis (EDA) on real-world datasets to identify audience trends and engagement patterns.
- Used Python (Pandas, NumPy, Matplotlib, Seaborn) to clean, process, and visualize data.
- Built dashboards and reports that translated raw data into insights to support business decisions.

Data Entry Specialist Intern — B2B Drive

Nov 2024 – May 2025

Remote

- Managed and organized WordPress-based client data, ensuring high data accuracy.
- Performed SEO optimization and content updates to improve online reach.
- Streamlined data management workflows, reducing turnaround time.

ACHIEVEMENTS

- Participated in BPPIMT TechFest 2025 and TechForum 2025.
- Engaged in data visualization challenges and AI innovation projects.
- Active cricket player and contributor to college-level sports.
- Solved 150+ Data Structures & Algorithms problems on LeetCode.
- LeetCode: Max Rating 1580.
- Ranked in the top 15% in LeetCode Weekly Contest.

EDUCATION

B.Tech, Electrical Engineering — BPPIMT, Kolkata, India

Sep 2023 – Sep 2027

Higher Secondary (Pure Science) — New Barrackpore Colony Boys High School

Sep 2021 – Oct 2023

CERTIFICATIONS

- Data Analytics using Python — Labmentix Pvt. Ltd.
- Detect Manufacturing Defects using Visual Inspection AI — Google Cloud
- Create and Manage AlloyDB Instances — Google Cloud
- OCI AI Certification — Oracle
